SUMMARY

I'm excited to use my web development skills in a team to build effective websites. With experience in making 10+ websites using WordPress, HTML, CSS, Python, JavaScript, PHP, React, WooCommerce, and REST APIs, I want to work on new projects and improve and showcase my web development skills. I have good hands-on experience in ChatGPT Prompt Engineering.

EXPERIENCE

Web Developer & Frontend Intern

Successfully designed and developed 10+ websites using WordPress, HTML, CSS, JavaScript, and PHP, enhancing client online presence. Completed a 15-day Frontend Development Internship and gained practical experience in web development. Worked on responsive user interfaces and improved understanding of modern web technologies.

PROJECTS

A&S Aesthetics – Medical Aesthetics Website

- WordPress • Elementor • UI/UX Design • Responsive Design
- Customized a professional aesthetics clinic website to present treatments, services, and clinic information in a clear, user-friendly layout.
- Organized treatment and service content with clear navigation and consultation call-to-action sections to help visitors explore services and make enquiries.
- Focused on a polished visual presentation and responsive usability across desktop and mobile devices.

Belion Technology – Medical Equipment Supply Website

WordPress • WooCommerce • Elementor • UI/UX Design • Responsive Design

- Developed and customized a **professional B2B/B2C medical equipment e-commerce website** for Belion Technology using WordPress, WooCommerce, and Elementor.
- Configured WooCommerce product catalog, categories, checkout workflow, payment integration, and inventory management for seamless online purchasing.
- Customized the website theme using CSS and Elementor to match the company's brand identity while improving website performance, responsiveness, and usability across all devices.

EcoSnap

React.js • JavaScript • Tailwind CSS • MongoDB

- Designed and developed an AI-Powered Sustainable shopping assistant that enables users to evaluate products through real-time barcode and QR-code scanning, promoting informed and eco-conscious purchasing decisions.
- Built an intelligent product analysis system featuring sustainability scoring, carbon footprint estimation, and side-by-side product comparison to help users identify environmentally friendly alternatives.
- Delivered a fully responsive web application with AI-driven recommendation, gamification features, and an intuitive user interface, ensuring seamless accessibility across mobile and desktop platforms.
